

1st March 2017

Dear Parents

We have been very lucky to have an Occupational Therapist individually assess some basic skills that will help your child during the year. The results are for you, the Parents. An individual home program has been designed for your child. It is vital to your child's development to follow this program. Your child's teacher is putting an immense amount of effort and time outside school hours to design and discuss these programs with you for the complete benefit of your child. We would like to have meetings with all parents to discuss the Occupational Therapy report, home program and to also give you an idea on how your child has settled into Pre Primary. The meeting timetable will be on the window outside the classroom or on the information board inside. The meetings will happen during Week 7 and 8, please put your name down in one of the times available.

Thank you for your cooperation and support.

The Pre Primary Team ☺
